To Whom It May Concern,

I am pleased to write this recommendation letter for **Saad Sameer Khan**, whom I have known for three years as an undergraduate student at our institute. I taught him three courses: Solid Mechanics, Fundamentals of AI & Machine Learning, and Design of Machines & Mechanical Systems. Throughout his academic journey, Saad demonstrated exceptional dedication and enthusiasm for the courses he pursued. Saad consistently displayed remarkable eagerness to explore subjects beyond syllabus and to gain a deep understanding of the core concepts.

One aspect that makes Saad an outstanding student is his proactive approach to real-life problem-solving. In the courses that I taught, Saad worked on several course projects which tested the ability of students to apply theory to practical situations. Some of the course projects that he worked on are designing a diving board for minimum weight, design of two stage helical gear box, designing and modeling a footwear testing machine, and developing a machine learning model to predict fatigue crack growth.

In particular, Saad showcased remarkable skills in tackling the machine learning course competition focused on predicting fatigue crack growth. His dedication to mastering the intricacies of machine learning algorithms, coupled with the ability to apply these concepts effectively, led him to secure the Second Prize in the competition. This achievement reflects his commitment to excellence and the ability to excel in challenging endeavors.

Apart from his core technical proficiency, Saad also demonstrated exceptional data analysis skills, specifically utilizing Microsoft Excel. His competence in handling data and drawing valuable insights from it was commendable, making him stand out as a well-rounded engineer.

Beyond his academic achievements, Saad exhibits outstanding leadership qualities and a collaborative spirit. He actively engaged with his peers during group projects and fostered a positive learning environment for everyone involved. Saad consistently contributed valuable ideas and displayed strong communication skills, which are vital in any professional setting.

Based on my interactions with Saad, I firmly believe he possesses the attributes necessary for a successful career in Mechanical Engineering. His dedication, passion for learning, and ability to apply his knowledge effectively make him a valuable asset to any organization.

I wholeheartedly and without reservation recommend Saad for any further academic pursuits or professional endeavors he may choose to pursue. I am confident that he will continue to excel and make significant contributions to his chosen field.

Should you require any further information or have any questions, please do not hesitate to contact me.

Sincerely,

Dr. Nilesh Raykar  
Professor, Mechanical Engineering Department,  
Sardar Patel College of Engineering, Andheri West, Mumbai, 400058
